# ONYX PDF
# Auto Splitter Page divider

https://onyxpdf.com

ONYX PDF makes document scanning seamless with its divider page and Automated Splitter feature. Here's how it works:

1. Insert the divider sheet between documents in your scanner's feed.
2. Scan your entire document pile in one go.
3. Upload the scanned PDF file to ONYX PDF.
4. ONYX PDF will identify the divider pages and split your documents accordingly.

Key features:

- Use multiple divider sheets in a single scan.
- Works for black and white printouts.
- Eliminates the complexity of manual document separation.
- Divider pages are automatically detected and removed, ensuring a clean final product.
